

# SGA Awards Media Kit

The winners of the 2022 SGA Awards were revealed during the Natural Gas Connect conference. They were selected from 68 submissions with more than 2,000 votes cast from Southern Gas Association members.

For decades, the Southern Gas Association has been an important forum for recognizing leading natural gas companies across the United States and Canada. SGA Awards recognize members who are advancing

the natural gas industry. Our aim is to support and showcase the great work of companies who have achieved real, measurable business outcomes in their organizations.

SGA Awards recognize individuals and teams for their technical contributions, professional excellence, career achievement, service to colleagues, industry leadership and community service.
