

1

Board of Directors

The Chair of the BOD provides a theme for the year. The BOD provides insight on industry trends that guide committees and taskforces in advancing the natural gas industry.

2

Executive Council

Serving as the conduit of exchanging information, the Executive Council meets to share information for the executive liaisons to then communicate to the Section Committees.

3

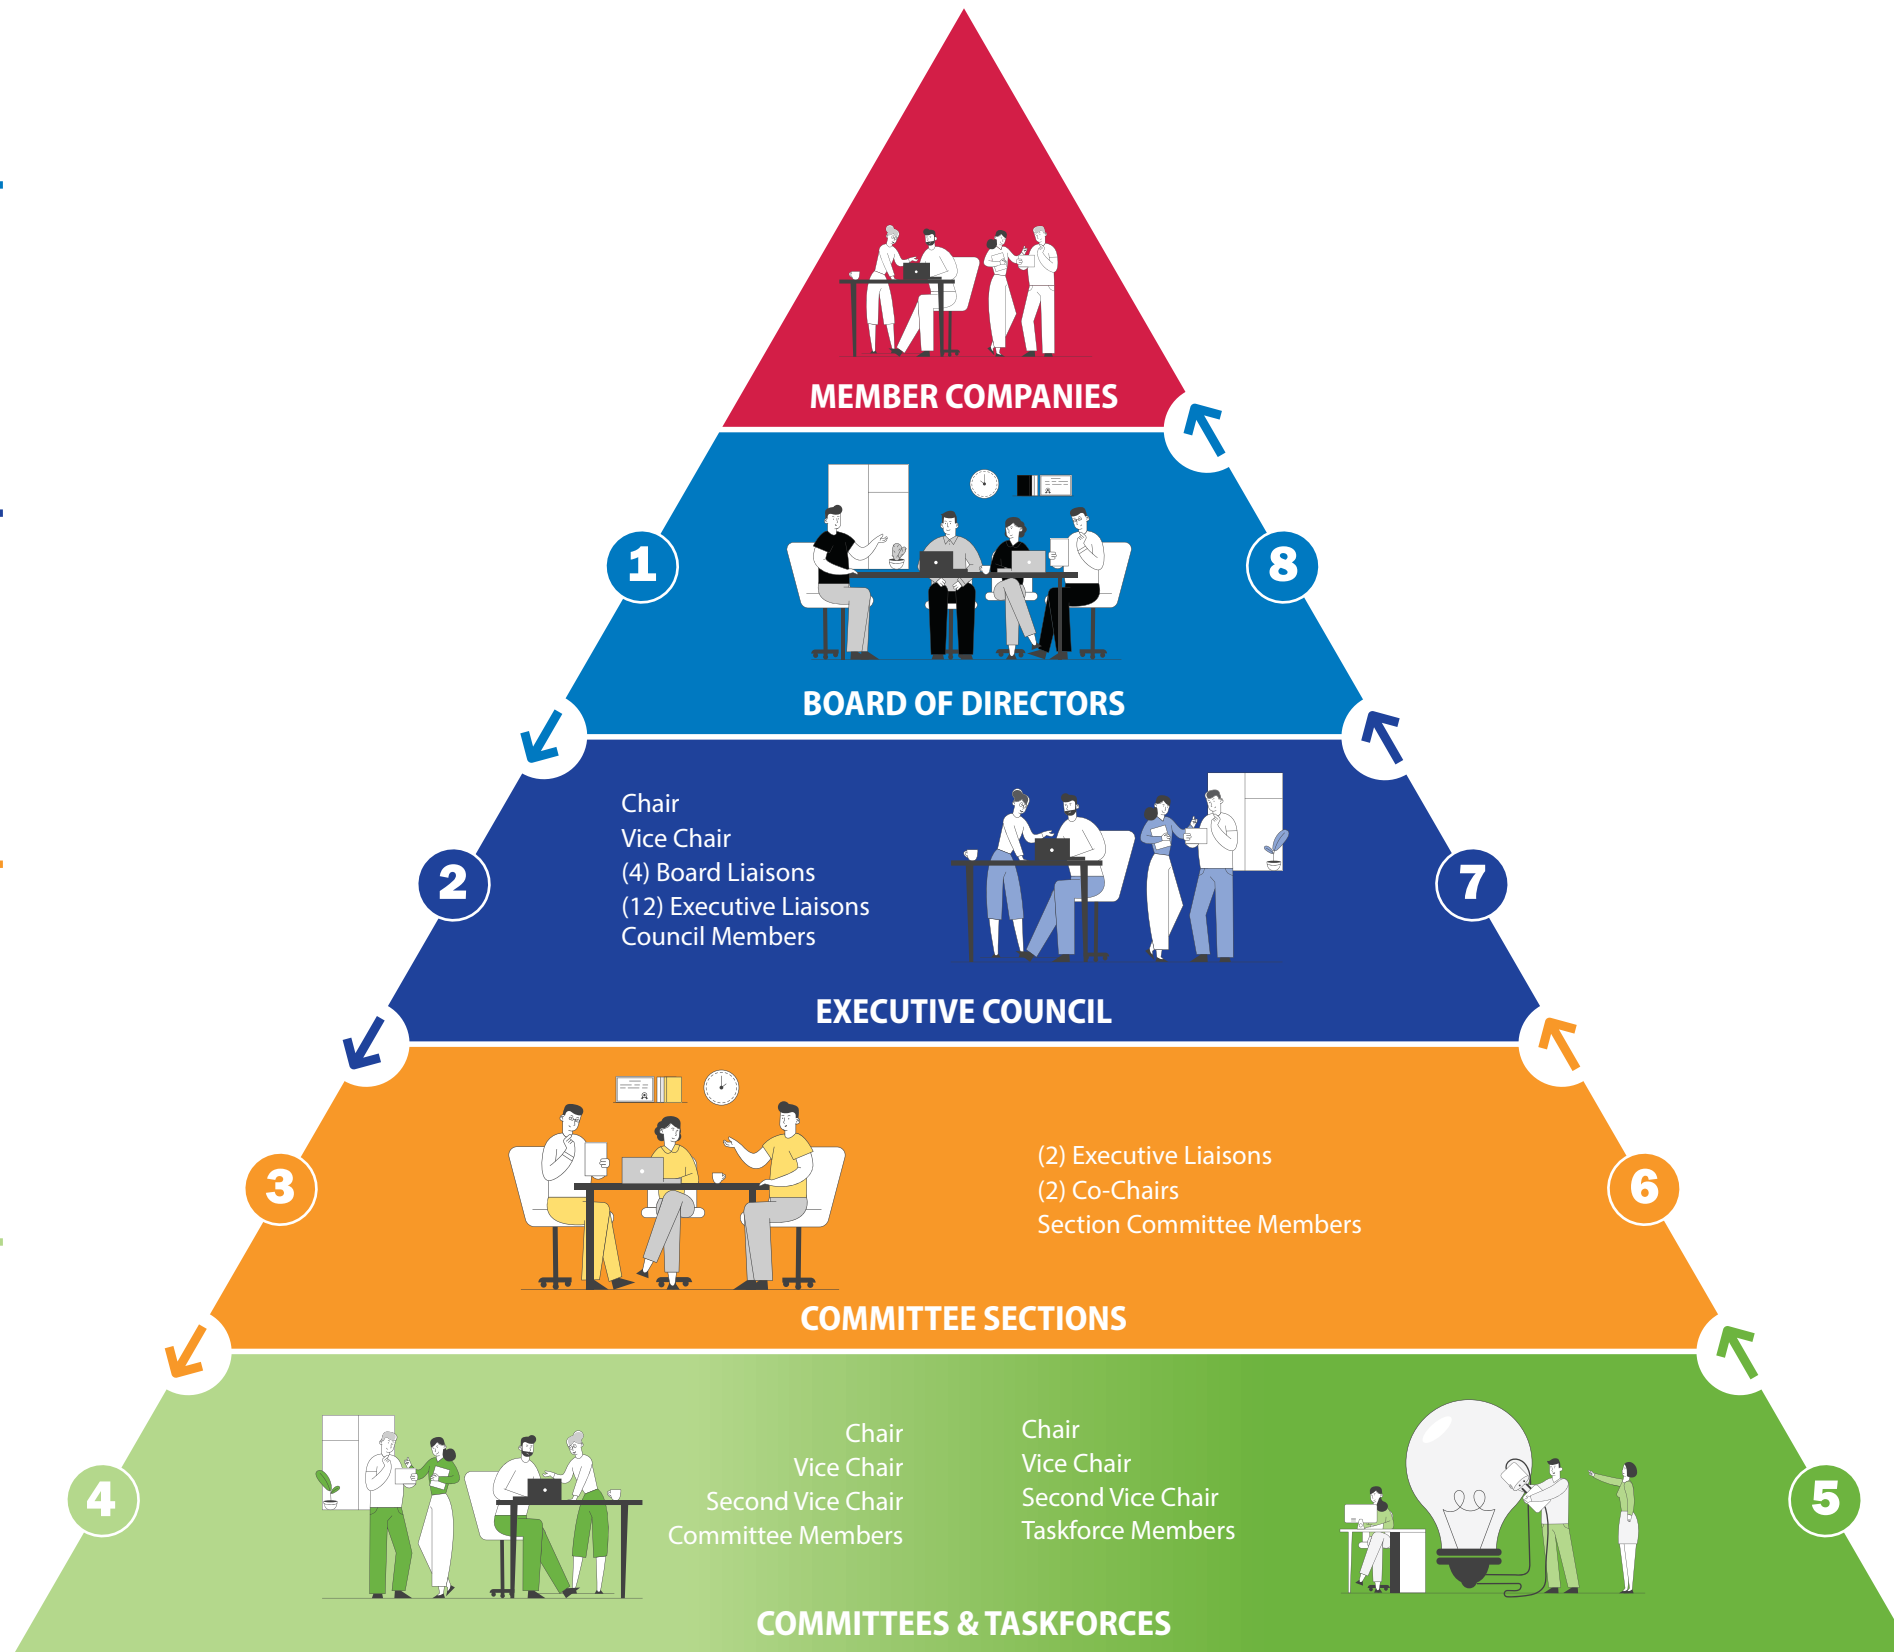

Committee Sections

Executive liaisons communicate with Section Co-Chairs who meet with Section Committee Members for individual “sponsors” to communicate with their committees — especially those that may be affected or provide more information.

4

Committees & Taskforces

These groups collaborate together with the known issues at hand with direction and guidance from Sections, Council, and the BOD to achieve deliverable results.

8

Results of the committee’s key impacts are presented to SGA membership.

The board provides leadership, support, and insight to sustain and innovate SGA committees in their entirety.

7

Chair and Vice Chair give an executive summary of all committees and their performance during the Executive Conference.

The Executive Council is dedicated to providing a vision and strategy specifically to SGA Committees for improved engagement, and professional development.

6

Executive Liaisons report committee summaries to the Executive Council, biannually.

Each Section provides a sponsor for guidance and direction to committee and taskforce members. The Section Committees are critical as their initial guidance and continued oversight ensures members find and keep momentum.

5

Committee and Taskforce chairs report deliverables to Section Committee, quarterly.

Members work on real time challenges by defining core issues of focus and then working toward possible solutions to move the needle, all while developing professionally.
