NATURAL GAS EXECUTIVE

LEADING NATURAL GAS ORGANIZATIONS FOR
HIGH-VELOCITY PERFORMANCE AND INNOVATION.

DELIVERED IN COLLABORATION WITH OU

YOUR NEXT STEP

Southern Gas Association's Executive Leadership Program is the only Accredited Leadership program designed for the Natural Gas Industry. *Accredited Natural Gas Executive (ANGE)* will enable high-potential industry leaders to benefit from intensive learning and leave equipped with new strategies to support them in the challenges ahead as they navigate the energy evolution.

The program is designed for diverse learning experiences such as face-to-face learning, short brainstorming sessions, peer-to-peer knowledge sharing, and technical applications. *ANGE* provides participants opportunities for intelligent and personal reflections on what it means to be a leader and to succeed as a thought leader and professional for organizations. Pre-readings and self-assessments encourage participants to reflect on their role in the organization and find opportunities for improvement.

Each participant will be assigned a seasoned natural gas executive as a coach and mentor.

Program participants will see their experience as a career milestone and a testament of their organization's commitment to their professional development and building an industry-wide culture of learning and innovation.

With a focus on real-life business challenges, ANGE allows for the immediate application of knowledge.

Second Cohort Launches November 2024

Hand-picked classes bring together tomorrow's leaders across functions and geography, creating an opportunity for shared thinking and an enhanced network. This collaboration will sustain our organizations and industry going forward. This program is the opportunity to co-create the journey and build a cross-disciplinary network of change agents.

AUDIENCE

WHO SHOULD ATTEND

INVESTMENT

20 DAYS OVER 18 MONTHS
2 DAYS EVERY OTHER MONTH

COST **\$15,000**

Class is limited to 20 enrollees

The *Accredited Natural Gas Executive* (ANGE) program is designed for high-impact, top-performing individuals—from function heads to directors to vice presidents—with 7+ years of experience in roles of increasing responsibility.

ANGE is designed with your needs in mind. Busy executives have competing priorities so we have designed the program to run over 18 months to allow you to be fully present in the immersion and manage your responsibilities and company priorities. ANGE is structured to be flexible with your time without compromising the depth of education.

Senior leaders who want to guide their organizations toward high performance and build their leadership capabilities to deliver high-performing teams, innovation and future ready skills will enroll in ANGE.

As an ANGE participant, you will acquire knowledge, resources, tools and insights to curate your own playbook for transforming your organization and sustaining a competitive advantage. You will network with accomplished peers from across the industry enabling collaboration and building relationships that will benefit you for the entirety of your career.

THREE MODULES

The *Accredited Natural Gas Executive* (ANGE) program is composed of three modules that together will prepare the executive to manage effectively in a changing environment:

- Leading Enterprise Transformation
- Strategy, Social Responsibility and the Business Environment
- Building a Dialogue for Innovation

WHY STUDY WITH US?

The natural gas business landscape is evolving. Southern Gas Association's *Accredited Natural Gas Executive* program is designed to equip high-potential business leaders with the skills required to navigate an era of uncertainty and transformation successfully.

World-renowned faculty from the University of Oklahoma's Ronnie K. Irani Center for Energy Solutions are thought leaders and industry experts equipping you to navigate and drive change.

ANGE provides a 360-degree view and integrated learning experience that will help you gain the knowledge, insight and confidence to drive dynamic business results.

Opportunity to earn credit toward a Master's degree in Natural Gas Engineering and Leadership.

Participating organizations will have first access to the University of Oklahoma's energy focused interns through a career fair hosted by Southern Gas Association.

83%
of global leaders say they feel unprepared for their new roles.
